

## VILLAGE OF HYDE PARK

# Public Forum Notice Village of Hyde Park Electric

**On Thursday, April 30<sup>th</sup> at 6:30 pm** a *public forum* will be held for customers of Hyde Park Electric to hear about the current status of things in the utility, including the recently announced electric rate increase. The meeting will be held at the **Hyde Park Town Office**, with many thanks to the Town, as we expect many of you to have questions and thus the extra available space will make it possible for more of you to attend.

The format will be a brief presentation to explain how the rate case was arrived at and to update attendees on other important issues. Then, a public comment / question and answer session will be held – hopefully taking up most of the time to enable you all to understand where things stand.

We have been having similar forums for many months now. However, we understand that the timing of those, in the afternoon, was not ideal for many. With the clear public interest in the recent rate case, this later time was selected to attempt to find a time that may work for many more people.
